FIREDANCE™ DOGWOOD

Cornus sericea 'Bailadeline'

USDA Hardiness Zone: 2-7

AHS Heat Zone: 7

Height: 3-4'

Width: 4-5'

Exposure: Full Sun

Shape: Compact, Mounded

Firedance™ Dogwood is more compact than the species and has a more uniform habit. White flowers in spring are followed by pretty white berries that are attractive to birds. The foliage turns a nice red-purple color in fall followed by red stems in winter, giving multi-season interest. It is tolerant of moist conditions, is suitable for rain gardens, and good on slopes to hold soil in place. Discovered by Terry Schwartz of Bailey Nurseries.
