Double Mint Gardenia is a step above in its capacity to rebloom and its compact, rounded growth habit. The double, 2 inch wide, fragrant flowers bloom repeatedly, offering that sought-after perfume all summer long. The lustrous, dark foliage are a vibrant backdrop to the white flowers. Double Mint grows to a maximum of 3 feet in height and spread, making this compact shrub perfect for smaller spaces and in containers where the fragrance can be enjoyed up close. Because of the reblooming flowers, it also makes an excellent retail presentation. Bred by Plant Introductions, Inc.
