

BANANAPEAL® SMALL ANISE TREE

Illicium parviflorum 'PIIIP-I' PP28,887

USDA Hardiness Zone: 7-9

AHS Heat Zone: 9

Height: 3-4'

Width: 3-4'

Exposure: Part Sun to Full Shade

Shape: Upright, Rounded

This compact, well-behaved anise tree has golden-yellow foliage and keeps a nice, mounded form as it ages and really stands out at retail. Leaves are wider than 'Florida Sunshine' and it's an improved grower in production. Unlike 'Florida Sunshine,' BananAppeal® doesn't send out long gangly shoots, and plants are more compact and disease resistant. With anise-scented foliage, it is a perfect accent plant in shade gardens, maintaining its small stature and luminescent yellow-gold foliage. We have observed no suckers to date.
