JADE PARADE® SANDCHERRY

Prunus pumila 'UCONNPP002' PP33,014

USDA Hardiness Zone: 3-7

AHS Heat Zone: 7

Height: 2-3'

Width: 4-6'

Exposure: Full Sun

Shape: Spreading

Jade Parade® Sand Cherry is a plant that can give landscapers and home gardeners a fresh perspective on mass planting groundcovers, and as an alternative to those with similar posture such as Gro-Low Fragrant Sumac. The foliage is an attractive glossy blueish-green, turning shades of yellow, orange, and red in the fall. Jade Parade® has a spreading habit, but rather than just creeping along the ground, the branches arch upwards. The bonus in spring is the small 1/2" white blooms that flower profusely along the stems and are followed by small black cherries in late summer. It is very tolerant of full sun and dry conditions once established.
