

MATCHA BALL® ASH LEAF SPIREA

Sorbaria sorbifolia 'Levgreen' PP31,202

USDA Hardiness Zone: 3-7

AHS Heat Zone: 7

Height: 2-3'

Width: 3-4'

Exposure: Full Sun

Shape: Rounded

Matcha Ball® forms a perfect round ball of pretty fernlike foliage in a fresh shade of green. (That green color reminded us of Matcha tea, thus the name.) When the foliage first emerges in very early spring there is a hint of color in the leaves and petioles that range from red to orange-peach in color, ultimately maturing to green. Unlike Sem, Matcha Ball® sparsely blooms and doesn't develop suckers so it maintains a tight round form throughout the growing season. Fall color is yellow. It prefers moist, well-drained organic soil, and tolerates full sun to some light shade. Discovered by Denis Levac of Québec, Canada.
