

## SPRING LACE VIBURNUM

*Viburnum 'Spring Lace'*

**USDA Hardiness Zone:** 6-9

**AHS Heat Zone:** 9

**Height:** 5-7'

**Width:** 5-7'

**Exposure:** Full Sun to Part Shade

**Shape:** Rounded

Spring Lace is a compact, rounded viburnum that is beautiful even before it blooms. But once those flowers appear it becomes an absolute standout. In May, Spring Lace is covered in pure white, fragrant, lacy inflorescences. Sterile florets are nicely balanced with fertile flowers, adding incredible texture to the landscape. The leathery, dark green leaves turn wine red in early fall and are evergreen in mild winters. This well-behaved shrub keeps its compact form and has minimal fruit set to date. Bred by Dr. Michael Dirr at the University of Georgia.
