THE BRAND

First Editions® is a premium brand of shrubs, trees, evergreens, vines and perennials that have been carefully selected based on market needs then trialed in production settings and in the field to ensure they perform for growers, landscapers, retailers and consumers.

Because we offer plants for the coldest areas of the United States and Canada, an exciting selection of cutting edge plants for the warmer regions of the country and a balanced offering for milder climates, First Editions® is truly unique as a national brand with emphasis on well-chosen regional assortments. With extensive distribution through a network of quality growers and an engaging marketing platform, First Editions® offers a refreshing and profitable alternative to other programs.

While a successful brand starts with good genetics and quality grown plants, marketing is equally important. From inspiration to brand awareness to packaging to purchase decision direction to plant care and how-to, our professional marketing team is dialed in to the changing consumer marketplace. We work hard to meet new and experienced gardeners on their own turf be it social media, a website, texting, editorial or in person with information they care about.

It takes commitment to launch a new brand and to build it into your way of doing business but good brands work - they attract the best genetics, build customer confidence, bring premium prices and make your business stronger.

LET YOUR
CONFIDENCE
GROW.

PRODUCT DEVELOPMENT

DEVELOPING, TESTING, INTRODUCING AND MARKETING SUPERIOR
NEW VARIETIES IS THE KEYSTONE OF FIRST EDITIONS®.

NEW VARIETIES

Introducing great plants starts with great genetics, be it our own objective-driven breeding work or exciting plants from other breeders. Our product development program includes a full-time breeding operation in Georgia, ongoing relationships with independent breeders, an internationally active plant finding program and a strong travel team that monitors markets domestically and internationally to stay ahead of trends.

Our approach to adding new products to First Editions® is straight forward.
It has to fill a market need:

- **MORE FLOWER POWER**
- **BETTER HABIT**
- **IMPROVED DISEASE RESISTANCE**
- **GREATER HEAT OR COLD TOLERANCE**
- **DISTINCT ADVANTAGE IN PRODUCTION**
- **BREAK THROUGH GENETICS**

TRIALING PROGRAM

Once a plant is identified as a potential candidate for First Editions®, it goes through propagation and production trialing at multiple nursery locations. It is also trialed in the field at various trialing sites around the country to see how it performs for the end user in different regions. In addition to Bailey Nurseries extensive field trials in Minnesota, Illinois, Oregon and Georgia, we have an external trialing program at 12 sites representing diverse growing conditions across the US.

First Editions® has teamed up with universities and botanic gardens across the country to fully vet potential introductions before they are selected for commercialization. The trials also give us regionally specific size, cultural and performance information for plants already in the brand. Trials are now conducted from Zone 3 to Zone 9 in the Mid-Atlantic, Midwest, Mountain, Northern, Southern, Southeastern and Western regions of the US.

GROWER PROGRAM

For over a century, people have relied on Bailey to provide you the highest quality plants and unrivaled customer service. We stand behind everything we grow - feet, firmly planted in the dirt.

Fulfilling your production needs, we offer a full range of bareroot First Editions® trees, shrubs, vines, and roses. Further, our innovative JumpStarts® potted liner program keeps you in the game, making it even easier to spread out your planting times and keep your inventory management consistent. 38-cell trays may also be available depending on availability.

Racked and ready to go! JumpStarts® can ship small package carrier (boxed), half racks (24 flats) or full racks (48 flats).

GROWER OPTIONS

We understand your business because we are growers just like you. As such, we offer a robust portfolio of liner options so you can keep your production schedules on track. Growers outside the licensed propagation network can purchase First Editions® liners from the following companies:

Bailey Nurseries
 Corporate Headquarters
 1325 Bailey Road
 St. Paul, MN 55119
 800.829.8898

Growing locations in Minnesota,
 Oregon and Illinois.

Griffith Propagation Nursery
 2580 Antioch Church Road
 Watkinsville, GA 30677
 (706) 310-0027

32-cell trays available on select varieties.

MARKETING INCREASES DEMAND AND ADDS VALUE

It all starts with a great product, and the outstanding plants offered by First Editions® make the story even easier to tell. However, the power of First Editions® marketing approach is driven by a key factor that is critical in today's consumer environment: engagement.

The traditional one-way marketing funnel of simply running a few print ads is over. We go where consumers go, on their own turf, where they are to open and most comfortable seeing and engaging with the brand: social media, print and digital magazines, online, billboards they see driving to and from work, and coming soon - text messaging!

Consumers know when they are being sold to, so at First Editions® it's all about creating opportunity for two-way or many-way engagement to maximize the excitement and understanding of the brand and the plants they want to be successful with. In turn, we learn trends, information needs, and which mix of communications are most effective so we can not only continue to enhance the experience they have with us, but also support your sell-through of First Editions® varieties.

Use **#LetsAskAmy** from Facebook, Twitter, Instagram or FirstEditionsPlants.com/letsaskamy/submit-a-question

and she will respond to any questions you have about gardening using First Editions® plants.

If she doesn't know, she'll ask us!

She can do it, so can you!

Consumers have connected with Amy in an instant. Why? She's one of them! Amy is a real-live person who had a typical consumer problem. She had a desire for a beautiful yard, but didn't quite know how to get there. The experience of buying plants was really intimidating. Sound familiar?

After a few bumps in the road, and with a little help from First Editions®, she was able to turn her Blandscape into a Landscape! While she doesn't consider herself a gardening expert, she feels much more empowered now that she has created a beautiful space and wants to share that feeling of success with others.

Topics are indexed on the website, creating a running gardening blog full of content consumers can refer to, to find more information about how to have success, keeping the experience full, rich, and organic! What's more, questions are answered in the medium they originated from which means we connect with people where and when they want us too.

CONSUMER & TRADE

“Print is dead.” Well, not really, but we hear this more and more. While it is true that there is a strong push towards more digital technology today, the reality is we still go where the market demands. We approach print through both advertisement and editorial content across the U.S. and Canada, both through national and regional publications.

In 2017, First Editions® showed up in a multitude of industry and consumer publications, including Fine Gardening, Country Gardens, Grower Talks, Lawn & Garden Retailer, The American Gardener, Nursery Management, Green Profit and more!

We build lasting relationships with writers, bloggers and other consumer influencers by meeting with them several times a year, sending plants, answering questions and bringing them to our nurseries to see the plants and the people behind First Editions®. The result is excellent editorial coverage, insightful how-to articles, inspiring real time photos, design tips, timely plant care information and fun DIY projects.

ADVERTISING – PRINT, DIGITAL, BILLBOARDS

Print

Our media mix has also increased to include regional publications so that we can talk about more specific varieties that do well in those areas. This is especially true with the broad assortment First Editions® offers. For example, if you live in Minnesota, chances are seeing an ad with crapemyrtle may just make you jealous. Conversely, a potentilla ad running in Georgia won't do much for you either.

Digital

We use banner ads to bring our message to life, drawing the attention of new and future customers.

Billboards

We continue to expand our regional billboard program with the specific goal of driving consumers to garden centers through thoughtful placement. In 2017 we ran billboards in Chicago and Kansas City with tremendous success as it helps increase brand recognition!

Fine Gardening, June 2017

Landscape Architecture Magazine, August 2016

SHRUBS

ETERNAL SUNSHINE™ ABELIA

Abelia x grandiflora 'PIIAB-II' PP25,305

Early blooming, abundant pink flowers cover this deciduous to semi-evergreen, mounding plant. Blossoming on new wood, this selection benefits from timely pruning to encourage new shoots and increase flower production. The juvenile growth is bronze and matures to bright emerald green that does not bleach or burn in southern sun. Bred by Plant Introductions, Inc.

ZONE 6-9 **H x W** 2-3' x 4-6' **EXP** Full Sun

SHAPE Mounding **OTHER ATTRIBUTES:** Deer resistant

STANDING OVATION™ SERVICEBERRY

Amelanchier alnifolia 'Obelisk'

Standing Ovation™ is covered in white flowers each spring, which often turn into edible berries in June. As the seasons continue, dark green, almost circular leaves change to red and orange in autumn. Its upright, perfectly oval form adds height in small gardens and provides nice structure during winter. Standing Ovation™ is a good alternative to columnar buckthorn. The uniform habit makes it great for hedging. From Valk Plants in the Netherlands.

ZONE 2-8 **H x W** 15' x 4' **EXP** Full Sun **SHAPE** Upright

BARBERRY COLLECTION

Barberry is one of the most widely used landscape shrubs in the northern U.S. for good reason: plant it and leave it alone. Cold hardy, heat tolerant and drought resistant, this no-fuss group of shrubs comes in a wide variety of shapes, colors and variations and can be used as a low border, in mass plantings or as a barrier hedge. Plus barberry is critter resistant so deer and bunnies don't bother it.

CABERNET® BARBERRY

ZONE 4-7

H x W 2' x 2-3'

EXP Full Sun

SHAPE Compact, Mounded

OTHER ATTRIBUTES:

- Deer resistant
- Drought tolerant
- Cold hardy

Berberis thunbergii atropurpurea 'Moretti Select'

This extremely dense, compact form of 'Crimson Pygmy' does not require pruning and is more winter hardy. Bright crimson new growth is followed by rich burgundy to purple foliage. Propagated from cultured stock blocks to ensure a true strain. From R & V Moretti Nursery.

DAYBREAK BARBERRY

Berberis thunbergii 'Daybreak' PP23,747

Daybreak is a colorful, compact barberry that holds up remarkably well in the south. The foliage emerges orange-red and eventually matures to bright yellow-gold that doesn't burn or bleach in the summer heat. It forms a beautiful rounded mound that requires very little pruning. It has been fruitless to date. Bred by Plant Introductions, Inc.

ZONE 4-8

H x W 1.5' x 1.5-2'

EXP Full Sun

SHAPE Compact, Mounded

OTHER ATTRIBUTES:

- Deer resistant
- Drought tolerant
- Heat tolerant

LAMBRUSCO™ BARBERRY

Berberis thunbergii 'BailElla'

Densely arranged leaves coupled with a spreading habit make this new barberry a useful landscape plant. The foliage emerges red and deepens to burgundy as the season progresses. Can be used instead of 'Crimson Pygmy' in colder climates since it is more cold hardy. Bred by Don Selinger and introduced by Bailey Nurseries, Inc.

ZONE 4-7

H x W 2-3' x 3-5'

EXP Full Sun

SHAPE Low, Spreading

OTHER ATTRIBUTES:

- Deer resistant
- Drought tolerant
- Cold hardy

LIMONCELLO™ BARBERRY

ZONE 4-7

H x W 3-4' x 3-4'

EXP Full Sun

SHAPE Mounding

OTHER ATTRIBUTES:

- Deer resistant
- Perfect as foundation plant
- Drought tolerant
- Yellow color doesn't burn in full sun

Berberis thunbergii 'BailErin'

Forming a tidy, round mound, this new barberry has chartreuse foliage with an unusual red, almost dotted pattern around the leaf margin through July in Minnesota. Fall foliage is orange, yellow and red. The bright color and habit make it a good accent plant in foundation plantings. Bred by Don Selinger and introduced by Bailey Nurseries, Inc.

MOSCATO™ BARBERRY

Berberis thunbergii 'BailAnna'

New foliage emerges lime green with a contrasting orange/peach margin, which fades to green in summer. Forms a densely branched, spreading mound, which fits easily in smaller spaces. Can be used as a substitute for boxwood in colder climates where boxwood is not winter hardy. Bred by Don Selinger and introduced by Bailey Nurseries, Inc.

ZONE 4-7 **H x W** 2-3' x 3-5'

EXP Full Sun **SHAPE** Low, Spreading

OTHER ATTRIBUTES:

- Deer resistant
- Drought tolerant
- Cold hardy

TOSCANA™ BARBERRY

Berberis thunbergii 'BailJulia'

ZONE 4-7

H x W 3-5' x 2-4'

EXP Full Sun

SHAPE Upright, Arching

OTHER ATTRIBUTES:

- Deer resistant
- Drought tolerant
- Cold hardy

The large showy foliage emerges red in spring with a fine, bright yellow margin. The margin eventually fades through summer, but the foliage remains a good red. The leaf color darkens in autumn, taking on flaming scarlet tones. Forms an upright shrub with arching branches. Bred by Don Selinger and introduced by Bailey Nurseries, Inc.

BUDDLEIA COLLECTION

With big wands of fragrant flowers in bright colors, *Buddleia* is the quintessential summer flowering shrub. Our selections flower continuously into fall if old blooms are removed, so plants can be cycle pruned for later season sales. Older plants are easily rejuvenated in the garden by moderate to severe pruning when needed. Plant sizes are for plants growing in Zone 7 - 9. Plants grown in colder winter climates don't get as large since they usually regrow from the crown every year. Bred by Plant Introductions, Inc.

FUNKY FUCHSIA™ BUTTERFLY BUSH

Buddleia davidii 'PIIBD-II' PP26,278

Rounded to upright habit with dark green foliage, gray beneath. The habit is more upright than 'Miss Molly' and 'Miss Ruby'. Rich reddish-pink inflorescences are very upright and quite fragrant. Showy flowers average 6-8" long and up to 10" long on vigorous shoots.

ZONE 5-9 **H x W** 6-8' x 6-8'

EXP Full Sun **SHAPE** Rounded to Upright

OTHER ATTRIBUTES: Deer resistant | Drought tolerant
Fragrant | Pollinator

GROOVY GRAPE™ BUTTERFLY BUSH

Buddleia davidii 'PIIBD-I' PP26,305

Rounded to upright habit with arching 8-10" long inflorescences. Rich, violet-purple flowers are fragrant.

ZONE 5-9

H x W 8-10' x 6-8'

EXP Full Sun

SHAPE Rounded to Upright

OTHER ATTRIBUTES:

- Deer resistant
- Drought tolerant
- Fragrant
- Pollinator

PSYCHEDELIC SKY™ BUTTERFLY BUSH

Buddleia davidii 'PIIBD-III' PP26,306

Well matched with Funky Fuchsia™ in habit and flower display, Psychedelic Sky™ has clear blue flowers on upright stems. Flowers average 6-8" long and up to 10" long on vigorous shoots. The habit is upright and tidy, like Funky Fuchsia™.

ZONE 5-9

H x W 4-6' x 4-5'

EXP Full Sun

SHAPE Upright

OTHER ATTRIBUTES:

- Deer resistant
- Fragrant
- Cut flower
- Pollinator

SAPPHIRE SURF™ BLUEBEARD

ZONE 5-9

H x W 2' x 3'

EXP Full Sun

SHAPE Spreading

OTHER ATTRIBUTES:

- Deer resistant
- Cut flower
- Great in mass plantings
- Pollinator

Caryopteris x clandonensis 'Blauer Splat'

This compact, low-maintenance shrub produces a swell of stunning blue flowers from top to bottom in late summer and fall when few other plants are blooming. The habit is lower growing than most *Caryopteris* so it makes a colorful groundcover. Sapphire Surf™ is deer and drought resistant. Selected by Kordes Nursery in Germany.

FIBER OPTICS™ BUTTONBUSH

ZONE 4-9

H x W 5-6' x 5-6'

EXP Full Sun

SHAPE Compact,
Rounded

OTHER ATTRIBUTES:

- Deer resistant
- Moisture tolerant
- Wildlife attractor
- Pollinator

Cephalanthus occidentalis 'Bailoptics' PPAF

Fiber Optics™ is a distinct improvement over the coarser species that grows twice the size of this compact selection. Native from Florida to Mexico and north to Nova Scotia and Ontario, buttonbush is quite happy in moist conditions, tolerating flooding and wet spring soil. As such it is often used in wetland restoration work, along streams and pond banks. It's also a great plant for low areas in the landscape that don't dry out until late in the season. Conversely, it grows well without excessive moisture in our Minnesota trial block. It has exceptional wildlife benefits and the seed is eaten by waterfowl. Selected by Bailey Nurseries, Inc. (CPBRAFF)

DOGWOOD COLLECTION

Our *Cornus* selections offer year-round interest with red stems in winter, flowers in spring and berries in summer. Some even offer great fall foliage color. Easy to grow in production and the landscape.

BATON ROUGE™ DOGWOOD

Cornus alba 'Minbat'

ZONE 3-7

H x W 4-5' x 4-5'

EXP Full Sun

SHAPE Upright, Rounded

OTHER ATTRIBUTES:

- Moisture tolerant
- Winter interest

Selected for its naturally compact, bushy habit and vivid red stems, Baton Rouge™ offers amazing year-round interest. White spring flowers are followed by white berries attractive to birds. Medium green foliage transforms to a brilliant reddish-purple hue in autumn. Stems turn bright red in winter making a spectacular display. Selected as a sport of *Cornus alba* 'Elegantissima'. From Minier Nursery in France.

CAYENNE DOGWOOD

Cornus amomum 'Cayenne'

Discovered in Fancy Gap, VA, this native selection stands out because the bright red stems shine all winter, even in warmer winter areas. Fresh green foliage looks good all summer and porcelain blue berries form in late summer. Good orange-red fall foliage. Appears to be Japanese beetle resistant in Georgia. Disease and canker-resistant. Like its cousins, Cayenne is well-suited to moist areas and is good in shrub borders, massed in moist areas and for wetland mitigation. Selected by Plant Introductions, Inc.

ZONE 4-9 **H x W** 6-8' x 8-10' **EXP** Full Sun **SHAPE** Rounded to Spreading

OTHER ATTRIBUTES: Moisture tolerant | Winter interest | Southern heat tolerant

NEW DOGWOOD

NEON BURST™ DOGWOOD

NEW

Cornus alba 'ByBoughen' PP 27,956

This new Tatarian dogwood from Bylands Nursery in British Columbia has attractive chartreuse foliage and is a compact selection growing 4-5' tall. It has good sun and heat tolerance, retaining bright leaf color throughout summer. New leaves are tinged with bronze and the stems have a rich red hue early in the season. Fall foliage becomes a rainbow of purple, red, yellow and orange. In winter the stems turn glossy scarlet red. (®CA)

ZONE 2-7

H x W 4-5' x 4-5'

EXP Full Sun to Part Shade

SHAPE Mounded

OTHER ATTRIBUTES: Winter interest

FIRE DANCE™ DOGWOOD

Cornus sericea 'Bailadeline'

FireDance™ is similar to 'Isanti' but has a much more compact, uniform habit. Our trials also show FireDance™ has fewer problems than the species. White flowers in spring are followed by pretty white berries that are attractive to birds. The foliage turns a nice red-purple color in fall followed by red stems in winter, giving multi-season interest. It is tolerant of moist conditions, is suitable for rain gardens and good on slopes to hold soil in place. Discovered by Terry Schwartz of Bailey Nurseries, Inc.

ZONE 2-7

COOL SPLASH® DWARF BUSH HONEYSUCKLE

Diervilla sessilifolia 'LPDC Podaras' PP19,391

Cool Splash®, the first variegated *Diervilla*, has bright white leaf margins that remain bright and clean until the first frost. Bunches of yellow blossoms adorn the plant in June and July. Easy to grow in a variety of soils as long as the soil is not bone dry. Cool Splash® is a densely branched shrub that forms underground suckers, developing colonies over time. Use in lightly shaded areas or mass plantings in full sun for a spectacular effect. Found by Peter Podaras.

DISTYLIUM COLLECTION

These tough evergreen plants are being used in great numbers in Zones 7 - 9 because they grow so well in so many situations. This remarkable group of plants can be planted in full sun to moderate shade and tolerates drought, extreme heat, wet soil and heavy clay. Our varieties are being used as alternatives for other plants plagued with problems such as boxwood, cherry laurel, hollies and Indian hawthorn in foundation plantings, landscape beds, median plantings and golf courses. Evergreen members of the witch hazel family, Distylium produces petite red flowers all along the stems in winter. Easy to prune for shape or size control. Deer resistant. Bred by Plant Introductions, Inc.

CINNAMON GIRL™ DISTYLIUM

Distylium 'PIIDIST-V' PP27,631

Cinnamon Girl™ has smaller foliage and a more refined look than other *Distylium* on the market, so it is an excellent alternative to boxwood and other evergreen plants beleaguered by insects and diseases in the south. Plum-purple new growth turns to blue-green as the leaves mature. In 2015, it came through winter with no burn while other varieties had moderate to severe dieback. Definitely our most cold hardy *Distylium* to date. (CPBRAFF)

NEW GARDENIA

SWEET STAR™ GARDENIA

NEW

Gardenia jasminoides 'PIIGA-III' PPAF

Blooming into late summer and early fall, Sweet Star™ is covered in single flowers starting early May. Excellent rebloom throughout summer. Flowers are followed by pretty orange fruit. Plants are nicely rounded with glossy green leaves and stay very compact in habit. Sweet Star™ originated from cold hardy wild-collected *Gardenia jasminoides* seed from the Beijing Botanical Garden. Reliably cold hardy in zone 7, it came through the record-setting 2013-14 winter in Athens, GA with minimal frost damage. Further winter testing will tell if it is also hardy in 6b. Makes up quickly in production. Bred by Plant Introductions, Inc.

SWEET TEA™ GARDENIA

Gardenia jasminoides 'PIIGA-II' PP27,258

This cross between Double Mint and Pinwheel™ produced a plant with the best features of both parents. With tennis ball size double flowers and excellent cold hardiness this heavy rebloomer has elegant, densely scented flowers. At 3-5' tall and wide, Sweet Tea™ is more upright and larger than Double Mint. It is also more winter hardy. In 2013-2014 this selection survived 4-6° F in an above ground container with no injury. That's saying something since many other gardenias suffered severe damage during the same winter. Bred by Plant Introductions, Inc.

HIBISCUS COLLECTION

Hibiscus syriacus or Rose of Sharon has been in the nursery trade a long time. Recent breeding work in Europe and the United States has generated renewed interest in hibiscus. With single and double flowers that bloom from June or July through September, this group of plants provides color for many months. Since flowers form on new growth you can encourage more blooms by removing old branches in winter. These plants are extremely adaptable in terms of soil pH and grow in almost any soil as long as it's not terribly dry or soggy all the time. Our selections are intermediate in size making them easier to manage. Use as a specimen or mass for effective summer color.

BALI™ HIBISCUS

Hibiscus syriacus 'Minfren'

Semi-double pure white flowers are highlighted with a bold purple-red center. Flowers are 3-4" in diameter. Bred by Minier Nursery in France.

HYDRANGEA COLLECTION

With so many hydrangea on the market, how do you choose? First Editions® trials and selects the best varieties for long-term landscape and garden performance. Our assortment is production and field tested so you can be confident these varieties perform as promised.

LIGHT-O-DAY® HYDRANGEA

Hydrangea macrophylla 'Bailday'

This elegant lacecap hydrangea stands out with remarkably refined, pure white variegation. The flower heads have a ring of bright white sterile flowers while the inner blooms are glowing blue or pink depending on soil pH. The dramatic blooms coupled with clean, bright foliage naturally draw attention and make this an outstanding feature plant in the garden or in containers. Selected by Bailey Nurseries, Inc.

DIAMOND ROUGE® HYDRANGEA

Hydrangea paniculata 'Rendia' PP24,667

This new variety has abundant, long lasting, rounded flower heads that start white and progress to pink, intense raspberry red and finally wine red. Flowers start blooming in July and take on red coloration earlier in the season than other pink paniculatas. Like other paniculatas that change from white to shades of pink or red, flower color is best in the fall when night temperatures are 10 degrees cooler than day temperatures. Compared to Strawberry Sundae®, Diamond Rouge® is slightly bigger and has distinct raspberry-red flowers that color earlier in the season. Benefits from multiple prunes in production to produce strong stems. Flower color varies based on climate and growing conditions. Bred by Jean Renault in France. (CPBRAFF, ®CA)

Hydrangea paniculata 'Renhy' PP20,670

The enormous flower heads are a blend of vanilla and strawberry, held upright on red stems. Flowers emerge creamy white in mid-summer, change to pink as the night temperatures drop and finally turn strawberry red. New blooms emerge as older blooms change color, giving the plant a multicolored effect in late summer and early fall. The red coloring lasts at least 3-4 weeks. Plants grow upright, then cascade later in the season. Excellent for fresh cut and dried flower arrangements. Flower color varies based on climate and growing conditions. Bred by Jean Renault in France. (CPBR #3963)

TICKLED PINK® HYDRANGEA

Hydrangea paniculata 'HYPMAD II' PP18,500

You'll be tickled pink by the extraordinary flowers on this hydrangea. Each bloom is completely covered by the sterile flower petals and each petal recurves giving the blossoms a full, frilly, lacy appearance. The blooms begin white before turning rosy pink. The habit is upright and compact with a height of just 4-6' so it is a good fit for small spaces. Bred by Dr. Michael Dirr at the University of Georgia.

Illicium parviflorum 'PIIIP-I' PPAF

This compact, well-behaved *Illicium* has golden-yellow foliage and keeps a nice mounded form as it ages. Leaves are wider than 'Florida Sunshine' and it's a better grower in production. Unlike 'Florida Sunshine', BananAppeal™ doesn't send out long gangly shoots, the leaves don't bleach in winter and plants are more compact and disease resistant. With anise-scented foliage, it is a perfect accent plant in shade gardens, maintaining its small stature and luminescent yellow-gold foliage. No suckers to date. Bred by Plant Introductions, Inc.

CRAPEMYRTLE COLLECTION

Magic crapemyrtles are bred for intermediate size and disease resistance as well as stunning flower coverage. Because of their smaller size, the Magics branch well, quickly filling out and flowering heavily in 3, 5 and 7-gallon containers. These heavy bloomers sell fast at retail, and their compact nature makes them easy to cycle prune for fall sales. The dark leaf varieties are an excellent alternative to purple leaf plums in Zones 7-9 where plums are defoliated by August. Excellent resistance to Cercospora. Bred by Plant Introductions, Inc.

OTHER ATTRIBUTES Drought tolerant

Physocarpus opulifolius 'Jefam' PP23,177

Amber Jubilee™ was selected for its striking new foliage in glowing tones of orange, yellow and gold. Rounded and dense in habit, this shrub with its bold array of colors makes an eye-catching hedge. Delicate white blooms are produced in spring. Summer foliage is green. Can be stage pruned in production through July to force colorful new growth. Fall foliage is highlighted with tones of red and purple, making this mildew resistant ninebark appealing over the entire season. Plant in full sun for best performance. Seedling selection of Diabolo® and 'Dart's Gold' ninebark. Selected at Jeffries Nursery in Manitoba, Canada. (CPBR #4765, ®CA)

PURPLE SUNSET™ POMEGRANATE

Punica granatum 'PIIPG-I' PP21,031

This restrained little pomegranate has great ornamental value in the landscape and in containers. With lustrous dark green foliage and a tight compact habit, it produces orange flowers and small purple fruits from spring through fall. Flowers on new growth so light tip pruning promotes more flowers and fruits. Bred by Plant Introductions Inc.

TIGER EYES® CUTLEAF STAGHORN SUMAC

Rhus typhina 'Bailtiger' PP16,185

Tiger Eyes®, one of the three inaugural plants in First Editions®, is a beautiful golden-leaved form of cutleaf staghorn sumac. New growth is a lively chartreuse green, quickly changing to yellow. Both colors contrasting nicely with the rosy-pink leaf stems. The branches angle upward while the deeply cut leaflets drape downward. As magnificent as the summer colors are, the dramatic effect of yellow, orange and intense scarlet in autumn are unparalleled. This showy plant is a great focal point in commercial landscapes. Tiger Eyes® tolerates a wide range of soils as well as urban conditions, and is adaptable to both poorly drained soils and very dry soil. Doesn't sucker profusely and does not have heavy seed set. Discovered by Steve Jorgensen of Bailey Nurseries, Inc.

Rosa 'CA 29' PP24,435

An exciting reblooming rose from the Canadian Artist Rose series, Campfire has exceptional hardiness combined with eye-catching blooms and bright glossy foliage on compact plants. Shapely buds with yellow and red tones open to semi-double flowers of yellow, edged in a deep rosy pink. As the season progresses, the pink edging becomes more prominent and produces an incredible smoldering blend of yellow and deep pink blooms that continue until frost. Dark green glossy foliage has excellent disease resistance; stems are smooth with only the occasional short thorns. Named in honor of Tom Thomson, one of the foremost artists in Canadian history. Own root. (CPBR #4471)

POLAR JOY® TREE ROSE

Rosa 'BAlore' PP16,909

Developed for northern gardens, Polar Joy® is a tough, dependable tree rose, surviving well even in frigid Zone 4 gardens without any winter protection. Soft pink blooms contrast nicely against light green foliage. It can be used as an eye level hedge or as a focal point at an entry way or in a pretty container. Polar Joy® is grown on its own root. Bred by Bailey Nurseries, Inc.

Phlox paniculata 'Ditomsur' PP21,109

Grape-colored blooms have striking dark eyes.

FRUITS

TAWARA ASIAN PEAR

Pyrus 'Tawara Oriental'

This fruiting Asian pear grown mainly for its edible fruit, has an upright oval form with glossy green foliage which looks great all season long. White flowers in spring make way to the unusual dark tan to light brown fruit, tasting like a cross between apple and pear, with crispy texture. Asian pear cultivars are partially self-fruitful but better crops are set where two or more cultivars are planted together. European pears or Asian pears, such as 'Seckel', 'Bosc' or 'Bartlett', can be used for pollination. Excellent for fresh eating or canning. Discovered by Jeanne & Jim Matsuda of Park Creek Nursery.
